Divertigranja A.C. is a nonprofit zoological farm in Oaxaca which teaches the public about animal welfare for both wild and domestic animals, with over 100 animals of 22 different species. At the same time we incorporate awareness about people with disabilities through an interactive program which puts visitors in the perspective of a person with a disability during their 2-3 hour tour of the farm, guided by a person with a disability. We mostly work in consciousness about disabilities for the non-disabled. We have opportunities for whatever time span you have available, as well as virtual volunteer work.
